Ticket Management

Modules for CRM

Role
UI/UX Designer

Tool Used
Figma, Miro, Photoshop

Project Overview

Design a user-friendly interface for managing tickets within a CRM platform, focusing on improving efficiency, usability, and user satisfaction.

Task

Context

- The module should allow users (e.g., support agents, team leads) to view, organize, and resolve customer issues efficiently.
- The platform is used for mid-sized customer service teams handling 500+ tickets daily, with integrations for email, chat, and phone. Ticket lifecycle: New → Assigned → In Progress → Resolved → Closed.

Key Features

- Dashboard Overview: A summary of total tickets (e.g., Open, In Progress, Resolved).
- Ticket List: A detailed view of all tickets with sorting, filtering, and search options.
- Ticket Details: Information about the customer, issue history, attachments, and internal notes, status dropdown, and action buttons (e.g., Assign, Reply, Resolve).
- Collaboration Tools: Options for internal notes, tagging team mates, and prioritizing tickets.
- Analytics: Visual indicators (e.g., charts or badges) showing ticket resolution time, SLAs, and agent performance.

Responsibilities

- Design wireframes or low-fidelity prototypes for the following screens:
- Ticket Dashboard
- Ticket List Page
- Ticket Detail View
- Create New Ticket Modal/Page
- Ensure the design is consistent with the overall CRM design system (e.g., colors, typography, components).
- Provide the design documentation, as needed(Miro, Photoshop, Figma).

User personas

- Support Agents: Responsible for resolving tickets.
- Team Leads: Monitor team performance and assign tickets.
- Admins: Set up workflows and manage overall settings.

Approach

Research

• User Persona

• Support Agent : Sakshi Sharma

• Team lead : Rajesh Kumar

• Admin : Sneha Kumar

• Insights

Ideate

• Overview map

• Mood board

Design

• Dashboard

Details

• Ticket list

Details

• Create new ticket
